MASTER OF VETERINARY MEDICINE (BY DISTANCE)

Do you have a passion for life-long learning?
Indulge it by studying via distance with Massey University’s respected Master of Veterinary Medicine (MVM) programme. Advance your knowledge, extend your skills, increase your job satisfaction and career potential.

Combine courses to complete one of the qualifications within the MVM programme or study a single course for interest.

2017 courses starting February
- Canine and Feline Endocrinology
- Canine and Feline Emergency Medicine
- Dermatology for Small Animal Veterinarians
- Veterinary Clinical Reproduction and Fertility
- Principles of Veterinary Epidemiology

Starting in July 2017
- Canine and Feline Neurology
- Ophthalmology in Small Animal Practice
- Canine and Feline Orthopedic Surgery
- Equine Lameness

For full enrolment instructions go to: how to enrol

Click dates and timing to see the full range of courses and when they are offered. Generally each course is offered once every two years.

MVM programme qualifications gives information about possible qualifications and research opportunities as part of your study.

Website: www.mvm.massey.ac.nz

Why the MVM?
- Wide selection of courses with lecturers who are leaders in their field
- Gain a formal qualification through study while you work
- Face-to-face on-campus workshops
- Extensive support for distance students from Massey University and the MVM team

How does flexible distance learning work?
Online classrooms bring our lecturers’ expertise to you. A range of modern online tools support your study including an extensive online library and forums for class participation.

Flexibility within the courses means you can organise your study around your work and other commitments.

Each course has its own “flavour” and the programme addresses a range of learning styles.
